## HYACINTHS

We offer our Hyacinths in various grades as mentioned below. Hyacinths for outdoor growing should be planted so that the bulb tip is covered no more than 3 inches. Planting dates vary, but they may

be planted safely until December 1 in most localities. Bulbs for forcing can be planted safely up to November 15. Hyacinths in glasses should be started in a cool basement until heavy root growth develops and then move to a bright airy room.
